INSTALLATION

To install the GCWM-123, decide where you would like your Xbox One X mounted. Locate a stud with a stud finder and draw a vertical line along the stud. Line up the mount with the holes following the stud, making sure the mount is level. Mark guides for hole placement. Drill pilot holes at the guide marks with a 3/16" drill bit. Insert the included wood anchors, using a hammer to make them flush with the wall. Attach the frocks to the inside top and bottom corner sections of the mount for padding. Secure the GCWM-123 to the wall using the #10 1½" flat wood screws included. Slide your Xbox One X through the side of the mount.
